

SMI CONVERSIONS

SMI's® philosophy is to help customers extend their investment in snowmaking by designing new products to be adaptable to older products. That way, as new automation, water, nucleation and valving technology evolves, this new

technology can be retrofitted onto your existing fans, carriages and towers.

Whether you're looking to upgrade an older SMI Highland snowmaker or to convert from another brand like Lenko, Areco, Sufag or Turbocristal using SMI Wizzard or PoleCat technology, we have

done them all. Conversion and upgrade services include new paint, servicing the compressor, and upgrades to electrical and automation components. Call SMI today for more details!

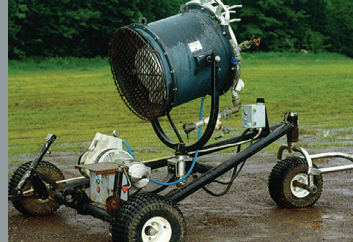

CONVERSIONS & UPGRADES

TurboCristal to Super PoleCat

Highland to PoleCat

HKD to Super PoleCat

TurboCristal to Wizzard

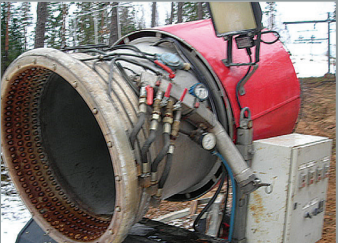

J10 to PoleCat

Lenko to PoleCat
